

Ideas for Student-to-Student Exemplars Talk

This is how I showed my thinking... how did you do it?

I think I am level _____ on the Exemplars Rubric for _____. What do you think I can do to grow?

Did something surprise you as you worked through the Exemplars task?

How can we add on to our solution?

Does anything in my Exemplars solution seem confusing? Are you still confused by something in the Exemplars task?

Who do you think used the most efficient way to solve the Exemplars task and why? Or is there maybe even a better way?

Let's summarize our thinking together...let's write down as many mathematical words we can use to explain it together?

How can we rewrite a similar problem together?
