1. Login to Exemplars Library: [library.exemplars.com](http://library.exemplars.com) with your school e-mail and password
2. Select the Grade 8 Unit you are working on:
  - [Unit 1: Rigid Transformations and Congruence](#)
  - [Unit 2: Dilations, Similarity, and Introducing Slope](#)
  - [Unit 3: Linear Relationships](#)
  - [Unit 4: Linear Equations and Linear Systems](#)
  - [Unit 5: Functions and Volume](#)
  - [Unit 6: Associations in Data](#)
  - [Unit 7: Exponents and Scientific Notation](#)
  - [Unit 8: Pythagorean Theorem and Irrational Numbers](#)
  - [Unit 9: Putting it All Together](#)
3. Once you are in the correct Unit, click on the task name, which is directly linked to the Exemplars Library where you can download a printer-friendly PDF and lesson planning sheet for the corresponding task.

## Illustrative Math: Grade 8

Unit 1: Rigid Transformations and Congruence  
 Lessons 1-17

Rigid Transformations (Lessons 1-6)	Properties of Rigid Transformations (Lessons 7-10)	Congruence (Lessons 11-13)	Angles in a Triangle (Lessons 14-16)	Let's Put It to Work (Lesson 17)
8.G.A.1 8.G.A.3	8.G.A.1	8.G.A.1 8.G.A.2	8.G.A.1 8.G.A.5	8.G.A.1 8.G.A.2 8.G.A.5

The standards of focus in this unit do not have any aligned tasks in the Exemplars Library because the standards cannot be assessed through problem solving. The standards are too narrowly defined to assess at DOK3.

**Depth-of-Knowledge Level 3 (Strategic Thinking)** requires reasoning, planning, using evidence, and a higher level of thinking than the previous two levels. In most instances, requiring students to explain their thinking is a Level 3. Activities that require students to make conjectures are also at this level. The cognitive demands at Level 3 are complex and abstract. The complexity does not result from the fact that there are multiple answers, a possibility for both Levels 1 and 2, but because the task requires more demanding reasoning. An activity, however, that has more than one possible answer and requires students to justify the response they give would most likely be a Level 3. Other Level 3 activities include drawing conclusions from observations; citing evidence and developing a logical argument for concepts; explaining phenomena in terms of concepts; and deciding which concepts to apply in order to solve a complex problem.
