

Middle School Math Performance Assessment Director

Established more than 25 years ago, Exemplars has been creating rich problem-solving performance tasks to engage students and develop their higher-order thinking, reasoning, and communication skills in mathematics. Our current material and rubrics are research-based and meet ESSA qualifications.

We are looking for a dynamic Math Performance Assessment Director to lead our middle school team, review performance tasks and complete the development of our latest math product for grades 6–8.

The ideal candidate has a keen interest in standards-based assessment using rubrics, an established record in teaching middle level mathematics and writing performance tasks. Strong familiarity with conceptual understanding at the middle level and experience with standards-based grading and math portfolios is required.

This position will receive extensive training to ensure you have the knowledge required to be successful.

Applicants must work well in a small office setting and remotely and be positive, flexible, upbeat and detail oriented. Strong communication skills are essential.

This is a 6-month project-based position that works 28 hours a week. Salary is commensurate with experience.

To get started on this new and exciting path please send résumé and cover letter to jay@exemplars.com. Office located in the greater Burlington, Vermont area.
